Overview

The SVHPS-1008RM is a 19" rack mountable 8 +2 port Gigabit Hybrid PoE Switch that transmits 1Gbps Ethernet and supports PoE +(up to 25.5W)

Using HP-01 (2 Port Hybrid PoE Switch), the device supports 100Mbps Ethernet transmission and PoE+ power supply up to 250 meters and it is possible to connect multiple devices in cascade mode.

With the built-in standard PSE and the over current protection function, the device supplies secured PoE+ power up to 25.5W by each port.

The NMS (Network Management System) feature with the Browser based GUI & the exclusive Management software allow monitoring and managing multiple Hybrid PoE Switches remotely from central office.
